U-CHANNEL POSTS

BLUE, YELLOW, ORANGE, GREEN AND GALVANIZED U-CHANNEL POSTS

MOUNTING HOLES- 3/8" DIAMETER ON 1" CENTERS, ENTIRE LENGTH

FINISH- GREEN PAINTED, HOT-DIPPED GALVANIZED OR POWDER COATED YELLOW, ORANGE, BLACK, BROWN OR WHITE

CUSTOM COLORS ALSO AVAILABLE

LENGTHS AND WEIGHTS- VARIOUS LENGTHS AND WEIGHTS ARE AVAILABLE

Vulcan's U-Channel sign posts can vary in length from 4 feet to 18 feet and from 1.12 pounds per foot to 4 pounds per foot in weight. In all cases 3/8 inch diameter holes are provided the entire length of the post on one inch centers.

Posts are made from new billet steel and boast 25% more tensile strength than competitor's rail steel.

Once the posts have been rolled, two types of coatings are available. One finish is polyester powder coating which is available in green, black, yellow, white, orange and brown (other colors by request). Galvanization is the second option which helps with corrosion protection. Posts are hot-dipped galvanized conforming to ASTM A-123.
