

## Vulcan, Inc. Announces 11,000 sq ft Expansion

FOLEY, Alabama (June 16, 2014) - On Wednesday, the fourth of June, Vulcan broke ground for an 11,041 sq ft expansion project for its utility sign division, bringing this facility to a total of 41,000 sq ft. This division specializes in the manufacture of high-performance marking products for the utility industry, with primary focus on the oil and gas market.

Vulcan Utility Signs has experienced a steady increase of business due in part to the boom of shale plays including the Eagle Ford, Marcellus and Bakken, leading to the need for additional manufacturing space. The primary end products are signs and related marking products used to identify the location of the thousands of miles of pipelines that move petroleum and natural gas. Vulcan proudly provides products directly to the majority of energy companies throughout the US, while also serving Mexico, Canada and the Middle East. Most new hires are already in place to learn our process before moving into this expansion. The project is expected to be completed by the middle of August.

Vulcan Utility Signs, a division of Vulcan, Inc., is an employee-owned company located near the Alabama Gulf Coast in Foley. Since 1935, Vulcan has focused on establishing and maintaining relationships with our customers and the communities in which we live and work. A longstanding reputation for quality products, service and competitive prices has placed Vulcan at the forefront of the oil and gas industry. This expertise has broadened our marketing arena to include the manufacture of aluminum coil, aluminum blanks and sheet, traffic control signs and custom metal stampings.
